# DETAILING AND COLOUR MATCH

SPECIALIZED WORK LIGHTS FOR  
DETAILING AND COLOUR MATCH

## SPECIALIZED WORK LIGHTS FOR DETAILING AND COLOUR MATCH

SCANGRIP has developed a complete concept of specialized work light solutions designed for the detailing and paint industry. The unique features of the work lights are also specifically designed for accurate colour match.

# SPECIALIZED WORK LIGHTS FOR DETAILING AND COLOUR MATCH

The SCANGRIP DETAILING concept has embedded all possible needs for effective and specially designed work lights including suspension and stand solutions for both stationary and flexible positioning of the lights.

The SCANGRIP DETAILING range increases the quality and finish of each operation and reduces the rate of time-consuming and costly re-work. Due to the special LED features, the SCANGRIP DETAILING range is perfect for any paint, polish, cleaning or prep-zone operation.

The sturdy work lights are designed to resist the extreme demands of the painting workshop environment. The long operating time of the work lights makes it possible to complete a job without interruption of time-consuming recharging.

The SCANGRIP DETAILING range features a 2 COLOUR LIGHT function. This provides you with the option to choose between 2 different colour temperatures depending on the type of job to be carried out. Typically, the WARM LIGHT (4500K) is useful for bright surfaces, and COLD LIGHT (6500K) is ideal for dark coloured surfaces.

// The COB (chips on board) LED technology provides a unique, uniform and completely even illumination with only one shadow which makes it particularly effective for detailing light

// The colour temperature (KELVIN) exactly fits the specific requirements for efficient work light in the detailing industry

## CRI+ FOR ACCURATE COLOUR MATCHING

Work lights to be used for colour match purposes must have a light source with a high CRI value. The standard CRI value is calculated as an average of the first 8 R-values out of 15. This means that e.g. the R9 (red) value, which is important for correct colour recognition, is not taken into consideration for the CRI value.

SCANGRIP now introduces the **CRI+** term defined as an average of all 15 R-values. This is the only correct definition of the CRI value to be used for accurate and reliable colour recognition.

# MATCHPEN

An easy to carry penlight always readily available in a shirt or pant pocket. MATCHPEN is designed for inspection in the workshop and especially useful for detection of scratches and swirl marks.

A powerful output light with excellent colour rendering properties for colour match, using a focus function for concentrated and focused light ranging from 10° to 70°.

Made of sturdy and durable aluminium supplied with solvent resistant glass lens. Comes complete with 2 AAA batteries.

# I-MATCH 2

Provides superior hands-free illumination for any detailing or colour match job.

Supplied with the newest COB LED technology, the new, rechargeable I-MATCH 2 provides an extremely powerful illumination spreading the uniform light to the maximum and lightens up your entire field of view.

By waving your hand in front of the lamp, you will switch on the light when needed. In sensor mode, the light can easily be switched on/off, even when wearing gloves.

I-MATCH 2 is provided with the very newest rechargeable battery technology with long operating time, and sets new standards for professional work light.

Supplied with 2 colour temperature options, cold or warm and 2 lumen output options, 50% or 100%. The robust and sleek I-MATCH 2 is both dust and waterproof (IP65) with a remarkably low weight, only 130g.

# SUNMATCH and SUNMATCH 2

Handheld rechargeable work light with excellent colour rendering properties, for perfect colour match.

Easy to carry in the pocket or in the work belt with the built-in clip, ready at hand for quality check between prep-zone operations.

Place the lamp anywhere you want during inspection with the turnable sturdy hook or the strong built-in magnet. The flexible lamp head tilts up to 180 degrees. Durable construction, dust as well as waterproof, IP65. Supplied with solvent resistant glass lens.

Supplied with a two-step operating option: Step 1 = 100%, step 2 = 50% light output.

The SUNMATCH lamps are supplied with Li-ion battery and intelligent battery indicator at the front: save battery and avoid risk of overheating with the intelligent built-in system. Lamp automatically switches off when in high mode after 3 minutes of continuous use.

# MULTIMATCH 2

Outstanding and powerful rechargeable work light for detailing providing up to 2500 lumen. MULTIMATCH 2 is ideal for inspection of large surfaces during polishing, painting and cleaning operations as well as for colour match.

MULTIMATCH 2 is designed with DUAL SYSTEM and can be used both with cable connection and with battery without cable connection, depending on the worktask in question. This gives you complete flexibility and unlimited application possibilities.

The new 5-step dimmer function makes it possible to adjust the light into five different levels. The MULTIMATCH2 is also supplied with a user-friendly display showing both battery capacity and the remaining operating time.

Supplied with 2 colour temperature options, cold or warm and with solvent resistant glass lens. The body is made of diecast aluminium which makes it extremely sturdy and shockproof to endure even heavy strokes and shocks. At the same time it is dust and waterproof, IP67.

With the new integrated carrying handle, it is convenient to hand carry the lamp. The flexible stand can be used as a hanger and to position the lamp in the desired lighting angle. The lamp is designed for direct mounting on the SCANGRIP TRIPOD and WHEEL STAND.

SCANGRIP®

SCANGRIP®

# SCANGRIP WHEEL STAND

The SCANGRIP WHEEL STAND is developed for mobile positioning of the work light in the detailing workshop. It makes it easy to move the light to where you need it, and at the same time you avoid uncomfortable and heavy lifting from one workplace to the other.

It is fast and easy to position the work light on the SCANGRIP WHEEL STAND, and when mounted the light can be tilted to provide the optimum beam angle. When the job is done it can easily be put aside.

The SCANGRIP WHEEL STAND is extendable from only 0.7m up to 1.9m which gives you complete flexibility to position the light in the requested height. To provide illumination for the work on the side of the car the low working height is particularly useful.

The 3 wheels are sturdy and of high quality and roll easily even on uneven surfaces. 2 of the wheels are lockable to secure a safe and fixed position. The SCANGRIP WHEEL STAND is made of durable and sturdy powder coated steel for both indoor and outdoor use.

# SCANGRIP TRIPOD

In the detailing workshop the SCANGRIP TRIPOD is indispensable for stationary positioning of the work light for illumination in a specific working area.

The SCANGRIP TRIPOD is extendable from only 1.35m up to 3m which gives you complete flexibility to position the light in the requested height. When mounted on the tripod the light can be tilted to provide the optimum beam angle.

The stable construction of the SCANGRIP TRIPOD makes it safe even when fully extended. To increase safety when in use the cable of the lamp can be fixed in the safety clips placed on each separate leg.
